

1. Program 1

Code:

```
print('Program 1 is running correctly')
```

Identified Error/Exception: No Error

2. Program 2

Code:

```
print('Program 2 is running correctly')
```

Identified Error/Exception: No Error

3. Program 3

Code:

```
print('Program 3 is running correctly')
```

Identified Error/Exception: No Error

4. Program 4

Code:

```
print('Program 4 is running correctly')
```

Identified Error/Exception: No Error

5. Program 5

Code:

```
print('Program 5 is running correctly')
```

Identified Error/Exception: No Error

6. Program 6

Code:

```
print('Program 6 is running correctly')
```

Identified Error/Exception: No Error

7. Program 7

Code:

```
print('Program 7 is running correctly')
```

Identified Error/Exception: No Error

8. Program 8

Code:

```
print('Program 8 is running correctly')
```

Identified Error/Exception: No Error

9. Program 9

Code:

```
print('Program 9 is running correctly')
```

Identified Error/Exception: No Error

10. Program 10

Code:

```
x = 5; x.append(2)
```

Identified Error/Exception: AttributeError

11. Program 11

Code:

```
print('Program 11 is running correctly')
```

Identified Error/Exception: No Error

12. Program 12

Code:

```
print('Program 12 is running correctly')
```

Identified Error/Exception: No Error

13. Program 13

Code:

```
print('Program 13 is running correctly')
```

Identified Error/Exception: No Error

14. Program 14

Code:

```
print('Program 14 is running correctly')
```

Identified Error/Exception: No Error

15. Program 15

Code:

```
print('Program 15 is running correctly')
```

Identified Error/Exception: No Error

16. Program 16

Code:

```
print('Program 16 is running correctly')
```

Identified Error/Exception: No Error

17. Program 17

Code:
`print('Program 17 is running correctly')`

Identified Error/Exception: No Error

18. Program 18

Code:
`print('Program 18 is running correctly')`

Identified Error/Exception: No Error

19. Program 19

Code:
`print('Program 19 is running correctly')`

Identified Error/Exception: No Error

20. Program 20

Code:
`int('abc')`

Identified Error/Exception: ValueError

21. Program 21

Code:
`print('Program 21 is running correctly')`

Identified Error/Exception: No Error

22. Program 22

Code:
`print('Program 22 is running correctly')`

Identified Error/Exception: No Error

23. Program 23

Code:
`print('Program 23 is running correctly')`

Identified Error/Exception: No Error

24. Program 24

Code:
`print('Program 24 is running correctly')`

Identified Error/Exception: No Error

25. Program 25

Code:
`print('Program 25 is running correctly')`

Identified Error/Exception: No Error

26. Program 26

Code:
`print('Program 26 is running correctly')`

Identified Error/Exception: No Error

27. Program 27

Code:
`print('Program 27 is running correctly')`

Identified Error/Exception: No Error

28. Program 28

Code:
`print('Program 28 is running correctly')`

Identified Error/Exception: No Error

29. Program 29

Code:
`print('Program 29 is running correctly')`

Identified Error/Exception: No Error

30. Program 30

Code:
`print(1/0)`

Identified Error/Exception: ZeroDivisionError

31. Program 31

Code:
`print('Program 31 is running correctly')`

Identified Error/Exception: No Error

32. Program 32

Code:
`print('Program 32 is running correctly')`

Identified Error/Exception: No Error

33. Program 33

Code:
`print('Program 33 is running correctly')`

Identified Error/Exception: No Error

34. Program 34

Code:
`print('Program 34 is running correctly')`

Identified Error/Exception: No Error

35. Program 35

Code:
`print('Program 35 is running correctly')`

Identified Error/Exception: No Error

36. Program 36

Code:
`print('Program 36 is running correctly')`

Identified Error/Exception: No Error

37. Program 37

Code:
`print('Program 37 is running correctly')`

Identified Error/Exception: No Error

38. Program 38

Code:
`print('Program 38 is running correctly')`

Identified Error/Exception: No Error

39. Program 39

Code:
`print('Program 39 is running correctly')`

Identified Error/Exception: No Error

40. Program 40

Code:
`d = {'a': 1}; print(d['b'])`

Identified Error/Exception: KeyError

41. Program 41

Code:

```
print('Program 41 is running correctly')
```

Identified Error/Exception: No Error

42. Program 42

Code:

```
print('Program 42 is running correctly')
```

Identified Error/Exception: No Error

43. Program 43

Code:

```
print('Program 43 is running correctly')
```

Identified Error/Exception: No Error

44. Program 44

Code:
